PantoneLIVE Private Library Manager

Store and Share Custom Colors in PantoneLIVE

Extend the Functionality of PantoneLIVE to Custom Colors
The traditional process of specifying a new color using a physical standard is subjective and can add significant time and rework. Private Library Manager enables the creation and secure sharing of spectral definitions for private colors within the PantoneLIVE ecosystem. This ensures consistent reproduction throughout print, textile, plastic, and coating supply chains, reducing lead times and maximizing the impact of new colors and designs.

### Ensure Everyone is Aiming for the Same Color Target

Digitize and share spectral definitions for custom and engineered colors on the target substrate with Private Library Manager, along with metadata tags containing important measurement information about how the color was measured. Private Library colors integrate seamlessly with X-Rite software and are accessible in Adobe Illustrator via the PantoneLIVE Illustrator plug-in.

Build a Connected Workflow on a Foundation of Precise Spectral Data

With Private Library Manager, brands can digitally manage and approve custom colors in the PantoneLIVE ecosystem, ensuring a single source of truth. It helps evaluate and remove duplicate colors, maintaining a streamlined color library. This clarity allows suppliers to meet expectations confidently, reducing rework and enhancing overall productivity and consistency.

PantoneLIVE Private Library Manager Store and Share Custom Colors in PantoneLIVE

Specifications

- Private Library colors can be used in PantoneLIVE Production for Print and Packaging and PantoneLIVE Production for Plastic, Coating & Textile.

- Private Library Manager colors seamlessly integrate in X-Rite's suite of color solutions, including ColorCert, Color iQC, Color iMatch, Autura Ink, InkFormulation Software, and more.

- Pantone and private colors hosted in the PantoneLIVE cloud are locked and cannot be modified, and only approved individuals can access them.

- PantoneLIVE Private Library Manager is a cloud-based architecture with a web interface and does not require software installation.

- When a private color is uploaded to PantoneLIVE Private Library Manager, it includes a metadata tag with information about how the color was measured, including:

  - Device geometry
  - Color owner
  - Substrate
  - Approval cycle
  - Date of publication

- PantoneLIVE is integrated with more than twenty 20 third party software solutions and digital print controllers. Authorized users of a private library can also use the colors in connected third party products.

- Users of X-Rite ColorCert can measure private colors and upload them to a PantoneLIVE Private Color Library to ensure the definition of the color in Color Exchange (CxF) format is completely in conformance with the rigorous definition of CxF required in the PantoneLIVE database.

Service Support & Warranty

Drawing on our extensive experience in the world of color, X-Rite Pantone offers the right level of services, onsite and online, to support and nurture your business. Call on us for standard color services and training, or work with us to tailor training and services to your specific needs. We help you get color right the first time, right every time.
